Year in Review

Shaping and Leading the Future

The American Dietetic Association is dedicated to advancing ADA’s members and the profession of dietetics in the eyes of the public, government leaders and agencies; and the education, health-care corporate and scientific communities. In all areas of food and nutrition, ADA is shaping the future that our members will inhabit and lead.

Meeting Fiscal Challenges

ADA is committed to increasing the Association’s stream of non-dues revenue and continuing to tightly control expenses. Success in each of these areas, with a rebound of the stock market, has allowed ADA to fund new member services and programs including the Leadership Institute, New Member Advisory Committee and ADA Times. ADA’s FY 2005 budget was balanced and continued to focus on providing new programs while controlling operational expenses, with no member dues increases in FY 2006.

Highest-Quality Care Based on Best Available Science

Health professionals increasingly are turning to evidence-based practice to improve the quality of care and to manage ever-escalating costs. Evidence-based practice, defined as reliance on the best available science as the basis for practice decisions, has emerged as a major core competency for dietetics professionals. During the past year, ADA appointed an Evidence-Based Practice Committee to oversee the development of guides for practice and evidence analysis projects. ADA’s online Evidence Analysis Library, a compilation of research on important dietetics practice subjects, was introduced, offering valuable resources for practitioners including bibliographies, conclusion statements, research grades and evidence summaries. ADA conducted training for members in evidence analysis and evidence-based grading and has developed and funded a five-year effort to support evidence-based practice. Evidence-based practice is being incorporated throughout ADA’s program of work: building evidence-based practice skills into education curricula; assisting members with development of evidence-based practice skills; and building evidence-based guidelines and ADA’s Nutrition Care Process and Model into all practice materials, publications and training.

More than 400 dietetics professionals have enrolled in ADA’s Dietetics Practice-Based Research Network, enabling them to continue improving their dietetics practice and delivery of food and nutrition services through outcomes-based research in their day-to-day practice settings.

The launch of ADA’s online Nutrition Care Manual in late 2004 offers health professionals an entirely new level of access to research-based nutrition information and clinical tools. In addition to information on diet and diseases with nutrition components, the manual features a customizable formulary of nutritional solutions; calculators for body-mass index, weight goal and body surface area; disease-specific screening and assessment forms; and a special section on cultural food practices—all in a searchable database.

Meeting Members’ Needs

ADA has been active and creative in developing programs, products and services to meet the needs of dietetics professionals. In the past year, the Journal of the American Dietetic Association began carrying articles containing free continuing professional education credits. ADA is in the process of rewriting and updating brochures and other publications that reflect recommendations of the 2005 Dietary Guidelines for Americans, which ADA members were instrumental in creating. ADA conducted its second Compensation and Benefits Survey of the Dietetics Profession. Members use this survey to research their market value and investigate factors that lead to higher salaries and other benefits, such as reimbursement for Association dues or funding to attend continuing education programs.

Public Policy and Advocacy

ADA’s goal is to influence the direction of legislation and public policy that affects the practice of dietetics. ADA’s advocacy efforts in Washington, D.C., during the past year focused on development of local school wellness policies as required by the 2004 Child Nutrition Act, reauthorization of the Ryan White CARE Act, which funds unmet health-care needs and support services for people with HIV/AIDS; reauthorization of the Older Americans Act; and expanding Medicare coverage of medical nutrition therapy.

Extending ADA’s Reach and Influence

As a nonprofit organization dedicated to providing accurate, science-based information to the public, the American Dietetic Association collaborates with others to achieve greater results than we could on the strengths of its own resources. Examples include ADA’s participation in the National Institutes of Health and Centers for Disease Control and Prevention’s National Diabetes Education Program. In addition to award-winning consumer education materials, the program features valuable tools for health-care practitioners.

Informing the Public

ADA continued its widespread and effective outreach to consumers, bringing the Association’s sound evidence-based information and healthful-eating messages to hundreds of millions of people through print, broadcast and electronic media. More than 2,500 interviews with ADA’s spokespeople appeared on every major TV network and news Web site; on local TV and radio stations; and in national and local newspapers and magazines. Highlights included more than a dozen appearances on nutrition topics by ADA’s spokespeople on CBS’s “Early Show” to a CNN interview devoted to the benefits of consulting with a registered dietician to healthfully lose weight.

As part of the ADA/ConAgra Foods Foundation consumer education program Home Food Safety … It’s in Your Hands, ADA developed a public service announcement featuring actress Faith Ford and ADA member Jackie Newgent, RD, CDN, that reached millions of people through airings on TV stations and in more than 2,600 Wal-Mart stores. A special section of Newsweek contained nutrition information provided by ADA and featured a full-page interview with 2004-05 ADA President Susan H. Laramee, MS, RD, FADA. In the April 11 issue of People magazine, a full-page ad from ADA asked the question: What’s your most valuable source of good nutrition? The answer: A registered dietician. The ad featured ADA member Elisa Zied, MS, RD, CDN.

For National Nutrition Month® in March, ADA secured window space in Rockefeller Plaza in Manhattan for a display highlighting “The Top Ten Reasons to Consult a Registered Dietitian.” More than 250,000 people passed the window each day during the month.
Operating Review

Setting ADA’s Direction, Governing the Dietetics Profession
In advancing the profession of dietetics and leading the Association, ADA assigns distinct and co-equal governance roles to the 17-member Board of Directors and the elected House of Delegates. Six House leaders serve on ADA’s Board, directly connecting the professional issues of members to the interests of the entire Association.

Board of Directors
The course of the American Dietetic Association is charted by a Board of Directors, consisting of national leaders in food, nutrition and public health.

During the past year, ADA’s Board continued to devote much of its efforts toward implementing the Association’s strategic plan for the 2004-08 period. Additional ADA activities and accomplishments at the Board level include:

• Strengthened ADA’s governance performance, including the review and evaluation of Affiliate and Networking Groups’ structures and relationships within ADA.
• Monitored the implementation of steps developed during ADA’s 2004 revamp of the Dietetics Practice Framework.
• Enhanced public policy and advocacy programs, including support of activities that expand coverage of nutrition services and raise reimbursement rates for dietetics professionals.
• Strengthened member focus through supporting activities that document the value of dietetics professionals, such as evidence analysis and evaluation.
• Implemented the revised Dietetics Practice Framework and approved its use as a guide for the Association. The Scope of Dietetics Practice Framework was published in the April 2005 Journal of the American Dietetic Association (pages 634-640) and is available at www.eatright.org/Member/PolicyInitiatives/83_21717.cfm.

During the past year, the ADA House of Delegates made significant strides, including:

• Discussed the issue of generational diversity in providing nutrition services to the various customers served by the profession during the Fall 2004 meeting. As a result of the discussion, the House requested the ADA Executive Team and ADA organizational unit management to review the results of the meeting comments. A final report was submitted to the ADA Board of Directors and House of Delegates in spring 2005 which prioritized ideas and implications for current and future programs of work for the Association.
• Approved the Scope of Dietetics Practice Framework developed by the Practice Definitions Task Force in November, 2004. The Framework was developed to assist dietetics professionals in making decisions about the appropriate level of safe and effective practice and serves as a guide for the Association. The Scope of Dietetics Practice Framework was published in the April 2005 Journal of the American Dietetic Association (pages 634-640) and is available at www.eatright.org/Member/PolicyInitiatives/83_21717.cfm.

The Foundation was again successful in generating support from corporations and members alike. Combining this effort with the continued focus on controlling operational expenses has allowed the Foundation to extend the reach of dietetics by providing scholarships and supporting research.

The 2006 Fiscal Year budgets continue these trends. In addition, the ADA Board of Directors has decided to use some of the 2005 Fiscal Year surplus to fund new research initiatives and programs that will continue to expand the value of the dietetics profession in the medical community.

The Foundation budget is aggressive and has increased its support for scholarships and research.

The 2006 Fiscal Year is shaping up to be a great year for ADA, the Foundation and all of our members. We look forward to meeting your needs as together we lead the future of dietetics.

ADA Financial Statements
ADA and the American Dietetic Association Foundation each ended the 2005 Fiscal Year with a surplus, continuing the positive momentum we gathered two years ago.

Many factors contributed to ADA’s success in the 2005 Fiscal Year. Our challenge was to raise non-dues revenue and continue to tightly control our expenses. The 2005 Fiscal Year results reflected both. All of these, along with the strong growth of the stock market, allowed the Association to fund new programs that would help increase the value of ADA membership.

The Foundation budget is aggressive and has increased its support for scholarships and research.

The 2006 Fiscal Year is shaping up to be a great year for ADA, the Foundation and all of our members. We look forward to meeting your needs as together we lead the future of dietetics.

### Commission on Accreditation for Dietetics Education

- Accredits almost 18,000 dietetic technology programs.
- Accredits about 250 district or local dietetic associations.
- Accredits about 50 state dietetic associations.
- Accredits about 100 international dietetic associations.

### Affiliate dietetic associations

- ADA also membership in the affiliate dietetic association of their choice, making affiliates a powerful benefit of ADA membership.
- Affiliates to members in the ADA's 50 state dietetic associations, plus the District of Columbia, Puerto Rico and the American Overseas Dietetic Association, all affiliated with ADA. Within these groups, there are approximately 250 district or local dietetic associations.
- Affiliates members to build lasting collaborations and relationships close to home.

### Dietetic practice groups

- ADA is committed to keeping our members abreast of trends in food and nutrition and preparing members for the requirements of an ever-changing profession.
- ADA's 29 dietetic practice groups are an important way in which DPGs create personal professional opportunities for members to excel and grow through professional development, networking opportunities, leadership development, and specialization.

### Commission on Dietetic Registration

- The Commission on Dietetic Registration remains committed to its public protection mission by attesting to the professional competence of more than 75,000 credentialed dietitians practitioners who have met CDR standards to enter and continue in dietetics practice.
- CDR is accredited by the National Commission for Certifying Agencies. CDR provides accredited programs.
- CDR is the primary authority on the quality of dietetics education, recognizing programs that meet the standards and is a reliable authority on the quality of nutrition/dietetics education programs.

### Operating Review (cont.)

The Commission on Accreditation for Dietetics Education serves the American public and ADA members by establishing and enforcing standards for the educational preparation of dietetics professionals, and by recognizing dietetics education programs at colleges, universities and other organizations that meet those standards. CCADE is recognized by the United States Department of Education and the Council for Higher Education Accreditation, affirming that CCADE meets national standards and is a reliable authority on the quality of nutrition/dietetics education programs.

CCADE’s scope of accreditation includes baccalaureate-and-graduate-level dietetics programs, post-baccalaureate dietetic internships and associate degree dietetic technician programs. During the past year, there were more than 600 such accredited or approved programs, preparing almost 16,000 students for entry to the profession.

CCADE’s program of work continues to fulfill its mission of ensuring the quality and continued improvement of dietetics education reflecting the evolving practice of dietetics. During the past year, CCADE continued to implement eligibility requirements and accreditation standards released in 2002 for education programs seeking initial and continued recognition. These accreditation standards are a product of CCADE’s comprehensive, ongoing process to maintain the currency of the educational competencies and to match those competencies to the expectations for future practice. In response to the interest of programs in other countries in the U.S. model of quality assurance and program evaluation, CCADE has also policies that will allow international, non-U.S.-based dietetics programs to apply for review and recognition.

Affiliate dietetic associations

All ADA members also receive automatic membership in the affiliate dietetic association of their choice, making affiliates a powerful benefit of ADA membership. There are 50 state dietetic associations, plus the District of Columbia, Puerto Rico and the American Overseas Dietetic Association, all affiliated with ADA. Within these groups, there are approximately 250 district or local dietetic associations.

Affiliates members to build lasting collaborations and relationships close to home.

Dietetic practice groups

ADA is committed to keeping our members abreast of trends in food and nutrition and preparing members for the requirements of an ever-changing profession and marketplace. Now in their 28th year, ADA’s 29 dietetic practice groups are an important way in which DPGs create personal professional opportunities for members to excel and grow through professional development, networking opportunities, leadership development, and specialization. Membership in DPGs was nearly 54,000 this year – the most ever.

ADA positions

The result of carefully considered deliberations by leading authorities as well as ADA’s House of Delegates, ADA position statements represent the Association’s stance on important issues in food, nutrition and health that affect the public.

During the past year, ADA published updated statements and support papers for health professionals and consumers alike on the following issues:

- **Benchmarks for Nutrition Programs in Child Care Settings**
- **Fat Replacements**
- **Fortification and Nutritional Supplements**
- **Nutrition across the Spectrum of Aging**
- **Nutrition and Women’s Health**
- **Nutrition Intervention in the Care of Persons with Human Immunodeficiency Virus Infection**
- **Promoting and Supporting Breastfeeding**

Commission on Dietetic Registration

The Commission on Dietetic Registration remains committed to its public protection mission by attesting to the professional competence of more than 75,000 credentialed dietitians practitioners who have met CDR standards to enter and continue in dietetics practice. CDR has engaged in the United States Department of Education and the Council for Higher Education Accreditation, affirming that CCADE meets national standards and is a reliable authority on the quality of nutrition/dietetics education programs.

CDR provides accredited dietetics education programs.

- **Registered Dietitian; Dietetic Technician, Registered; Board Certified Specialist in Renal Nutrition**
- **Registered Dietitian; Dietetic Technician, Registered**

These programs are scheduled for implementation in 2006.

In addition to administering examinations and recertification for these programs, the Commission on Dietetic Registration:

- Administers a prior approval process for continuing professional education programs. More than 5,000 programs were reviewed and approved in 2004-05.
- Administers a program provider accreditation process for continuing professional education program providers. There are currently 113 accredited providers.
- Maintains a searchable continuing professional education database of more than 6,000 programs.
- Administers licensure board services, including use of CDR’s registration examinations for licensure purposes and continuing professional education tracking for licensed non-registered practitioners.
- Administers certificates of training in childhood and adult weight management. Since implementation in April 2001, more than 4,000 members and credentialed practitioners have participated in these programs.
## American Dietetic Association Foundation

### Operating Review (cont.)

The ADA Foundation is the only 501(c)(3) organization devoted exclusively to nutrition and dietetics. As the philanthropic arm of the American Dietetic Association, the Foundation funds the future of the dietetics profession through research and education.

### Research

Raising money for the ADA Foundation Food and Nutrition Research Endowment continues to be a priority for the Foundation.

More than $1 million has been raised for this initiative to date. Notably, Susan and James Finn and Kenneth W. Wear gave generous gifts to this campaign. The research endowment will help keep dietetics professionals at the forefront of knowledge in food and nutrition science and will enable ADA members to provide the public with the most up-to-date and accurate food and nutrition information. Annually, $30,000 in awards and mini-grants is available to ADA members for dietetics research.

The Foundation funded, thanks to generous donations from Ann A. Hertzler and Herbert and Nylde Gemple, the childhood overweight section of the Evidence Analysis Library as well as a section on spinal cord injury and nutrition. The EAL facilitates comprehensive understanding of food and nutrition science and elevates the dietitians' role in analyzing related research.

### Education

The ADA Foundation is committed to reducing financial roadblocks and creating incentives for the best and brightest to pursue careers in dietetics. The ADA Foundation is the largest provider of academic scholarships in the dietetics field, annually providing funding to deserving students at all levels of study.

For the 2005-06 academic year, ADAF awarded 186 scholarships totaling $238,850. In addition, $70,000 was awarded in the form of fellowships, research mini-grants, recognition awards and education stipends.

Special thanks go to the Foundation's corporate scholarship sponsors.

- ConAgra Foods
- Colgate Palmolive
- Distilled Spirits Council of the US
- ECOLAB
- Elst North America
- Marsh Affinity Group, a Division of Seabury and Smith
- Mead Johnson Nutrionals/Bristol-Myers Squibb
- Sodexo Health Care Services

### Public Awareness

Increasing public understanding of both the importance of nutrition and of the dietetics professional’s role in providing sound advice is the goal of the ADA Foundation’s public awareness initiatives. A top priority is educating the public on creating a healthier lifestyle for all children, especially those at risk for obesity.

Over $1.5 million dollars has been awarded through the Foundation’s partnership with the General Mills Champions® Grants program. Hundreds of community based programs across the US are now working to educate children, their families and communities about good nutrition and physical fitness.

### Supporters of the ADA Foundation

The ADA Foundation thanks organizations and individuals who have made gifts or pledges of $10,000 or more to help support research, education and public awareness initiatives.
