Project & Care Team Roles and Responsibilities
Multidisciplinary Project and Care Teams Are Essential for Effective Implementation of the MQii

- The Project Team consists of demonstration leaders responsible for guiding overall execution of the intervention
- The Care Team is responsible for direct patient care
  - Given the consideration of patient-centered care throughout this demonstration, patients/family caregivers are considered an integral part of the Care Team
WHEN BUILDING THE PROJECT TEAM, YOU SHOULD CONSIDER IDENTIFYING INDIVIDUALS TO FILL THE FOLLOWING ROLES:

- Executive Sponsor
- Physician Champion
- Nurse Champion
- Dietitian Champion
- Patient Experience Officer
- Informatics Representative
- Project Champion
- QI Representative

Project Team roles can be customized based on your facility’s existing organization structure. Roles are not mutually exclusive and individuals may play more than one role.

*Detailed Project Team role descriptions are provided in the Appendix of this slide deck.
Care Team Roles and Responsibilities

THE CARE TEAM IS RESPONSIBLE FOR DAY-TO-DAY CARE OF THE PATIENT AND MAY INCLUDE BOTH MEDICAL AND NON-MEDICAL PERSONNEL

Care Team members will vary by the care needs of each unique patient. However, a dietitian, nurse, and physician are anticipated at a minimum.

Note: The Care Team members listed above are intended to be illustrative and do not represent all possible
Key Care Team Members at Each Workflow Step

Patient
Throughout the MQii, patients are expected to be informed participants in their care, helping to drive decision-making as a member of the Care Team.
