February 2019

Guidance Information Documents – Updated

ACEND® has recently updated the Guidance Information Document for 2017 Accreditation Standards and the Guidance Information Document for Future Education Model Accreditations Standards. These documents contain information to help program directors interpret the standards and clarify expectations for the completion of self-study documents.

Future Education Model Accreditation Standards Revisions

The ACEND® Board approved the following revisions to the Future Education Model Accreditation Standards for Associate (FA), Bachelor’s and Graduate Degree Programs during the January 23-25, 2019 meeting:

1. Removed the requirement for tracks in RE 1.2, 1.5, 3.2, 4.1, 5.2, 8.3 and 9.1. Programs can continue to have tracks but ACEND® will not require them.
2. Added requirement for the issuance of a verification statement to FA Standard 1, RE 1.3.
3. Combined and reworded Standard 2, RE 2.3 and 2.4 (program-specific and ACEND-required objectives) to make them more consistent with the 2017 Accreditation Standards. The changes include the expectation that data on all ACEND®-required objectives be evaluated annually using an average of data from the previous three years and that the specified language is used in the objectives.
4. Revised Standard 4, RE 4.1 to clarify expectations for the curriculum map.
5. Revised Standard 5, RE 5.1 to clarify expectations for competency assessment.

These changes will become effective on July 1, 2019 and demonstration programs accredited under the Future Education Model Accreditation Standards are expected to be compliant with these changes by July 1, 2019.

April 2019
2019 Compliance Audit on the 2017 Accreditation Standards – Due September 20, 2019

ACEND® will be conducting a review of each program’s mission, goals and objectives for the 2019 compliance audit. The ACEND Board is asking all programs to demonstrate compliance with Standard 3, Required Elements 3.1-3.3, of the 2017 Accreditation Standards. To do this each program must submit their Program Evaluation Plan and an active link to where the mission, goals and objectives and the statement that program outcomes data are available on request are located for prospective students/interns and the public on the program’s website. All programs were to have made any revisions needed to comply with changes to the Standards by July 1, 2018.

To comply with the audit, the ACEND® Board requests that programs submit the following to ACEND at standardscompliance@eatright.org no later than Friday, September 20, 2019.

- The most recently reviewed Program Evaluation Plan (Standard 4, Required Element 4.1)
- Link(s) to their website showing where the mission, goals, objectives and outcomes statement can be located (Standard 9, Required Elements 9.3.b and 9.3.c)

Program Director Webinars – How to Develop Mission, Goals and Objectives and a Student Learning Outcomes Assessment Plan

ACEND® staff have developed webinars to train program directors on the following 2017 ACEND® Accreditation Standards:

- How to develop the program’s mission, goals and objectives (Standard 3)
- How to develop the program’s Program Evaluation Plan and Continuous Program Improvement Plan (Standard 4)
- How to develop the program’s Student Learning Assessment Plan (Standard 6)

Please review the webinars to help further your knowledge on ACEND® 2017 Accreditation Standards 3, 4 and 6. Do not hesitate to contact your ACEND® staff manager if you have any questions.

Update on the Pearson VUE ACEND® Summary of Candidate Testing Report

ACEND® worked with the Commission on Dietetic Registration and Pearson VUE to make a change to the ACEND® Summary of Candidate Testing Report. Many program directors have voiced concern that the data in the section for "Testers within one year of First Attempt" is incomplete for the most recent year as those students had not yet completed their one year time frame before the report was issued.

The three-year pass rate summary reports distributed in February 2019 will be changed so that the data in the "Testers within one year of First Attempt" section will be based on the year in
which the candidate's one year time frame ends. Data in the current report included data in the
"one year from first attempt" that was based on the year the candidate first took the exam. In the
new report, data for 2017, for example, will include all candidates who took the exam for the
first time in 2016 and their "one year from first attempt" ended in 2017. This will allow for the
report to always have complete data. The results of candidates who take the exam for the first
time in 2016 would be recorded in the year 2016 in the "first attempt" table; the results for those
same candidates for "one year from first attempt" would be recorded in the year 2017 as that is
the year that their one year time period from first attempt ended.

The new report will contain two tables, which will be similar to those shown below. One will
include the information on exam results for the tester's first attempt within a specified year and a
second table will include exam results for the tester's pass rate within one year of first attempt.
Both tables will contain the institution’s results and the national results.

The data are for the same program in both tables. The group of candidates (n=18) who took the
exam for the first time in 2015 would have their "one year from first attempt" end in 2016 so
they are the same 18 shown for the year 2016 in the second table.

---

May 2019

Spring Dietetic Internship Match Data

Each spring, graduates of didactic programs in nutrition and dietetics (DPD) participate in a
computerized match process run by D&D Digital for placement in a nutrition and dietetic
internship program. The results of the first round of the April 2019 computer match and a
comparison with the previous three years are shown below:

<table>
<thead>
<tr>
<th></th>
<th>April 2016</th>
<th>April 2017</th>
<th>April 2018</th>
<th>April 2019</th>
<th>% Change ’18--’19</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students Matched</td>
<td>2500(48%)</td>
<td>2622(54%)</td>
<td>2712(57%)</td>
<td>2565(61%)</td>
<td>-147(5%)</td>
</tr>
<tr>
<td>Students Preselected</td>
<td>176(3%)</td>
<td>91(2%)</td>
<td>228(5%)</td>
<td>199(5%)</td>
<td>-29(13%)</td>
</tr>
<tr>
<td>Students Not Matched</td>
<td>2524(49%)</td>
<td>2126(44%)</td>
<td>1784(38%)</td>
<td>1437(34%)</td>
<td>-347(19%)</td>
</tr>
<tr>
<td><strong>Total Participants</strong></td>
<td>5200(100%)</td>
<td>4839(100%)</td>
<td>4724(100%)</td>
<td>4201(100%)</td>
<td>-523(11%)</td>
</tr>
<tr>
<td><strong>First Time Applicants</strong></td>
<td>4264(82%)</td>
<td>4016(83%)</td>
<td>4015(85%)</td>
<td>3655(87%)</td>
<td>+2%</td>
</tr>
</tbody>
</table>
As shown in the table, the match rate (i.e. the percent of applicants who match to a DI program in the first round of the computer match process) has steadily improved over the past four years. Factors contributing to this improved match rate likely include:

- **Decreased number of graduates from didactic programs in nutrition and dietetics (DPD):** Data from DPD programs indicate that the number of graduates in 2018 (6,281) was 9% less than the number of graduates in 2016 (6,887) reflecting a nationwide trend in declining university undergraduate enrollment.

- **Decreased number of applicants participating in the computer match:** The overall number of applicants participating in the computer match in April 2019 was nearly 1,000 (19%) less than the number of applicants in April 2016. The number of applicants, who had not matched in a previous cycle and were reapplying, also decreased from 936 in 2016 to 546 in 2019, a 42% decrease. ACEND® data from Program Annual Reports indicated that more than half (61%) of DI programs had fewer applications in 2018 compared to 2016 (25% had an increase in applications; 14% had no change).

- **Increased number of supervised practice options:** ACEND® has encouraged growth in nutrition and dietetics internship (DI) and coordinated (CP) programs. Between 2010 and 2018, 10 new CPs and 17 new DIs have opened and 2018 enrollment (compared to 2010 enrollment) increased by 22% in CP (n=347) and 47% in DI (n=1,330) programs. In addition, more than 800 individuals completed an Individualized Supervised Practice Pathway (ISPP) during that time. In 2019, 12 newly accredited future education model graduate programs began admitting students.

- **Moratorium on new Didactic Programs in Nutrition and Dietetics (DPD):** ACEND® has not accredited any new DPD programs since 2009. ACEND® also monitors DPD enrollment to help control the numbers of DPD graduates to better align with the number of supervised practice openings.
Revisions to ACEND®'s Inactive Status Policy

The ACEND® Board recently updated ACEND® Policy 4.6, Inactive Status. The Inactive Status policy has been revised to change the terminology from 'Inactive Status' to 'Admission Hold' to more clearly represent the substantive change. To correspond with this, the Guidelines for Requesting Substantive Changes have been revised to "Change to Admission Hold Status" and "Resume Active Admission Status".

An Admission Hold is when a program intends to stop the admission of students/interns for up to two academic/program years. To aid programs in providing the appropriate documentation when submitting an Admission Hold request, ACEND® has developed an Admission Hold template. When a program that has been on an Admission Hold Status would like to restart their normal admission process, they must again complete a Substantive Change request to resume active admissions. To view the ACEND® Policy and Procedure Manual, Guidelines for Requesting Substantive Changes and the Admission Hold Template please visit ACEND® Policy and Procedures.

New ACEND® Tool for Faculty & Preceptor Training

ACEND® has created a narrated Power Point reviewing key topics of interest for faculty and preceptors of ACEND-accredited programs. These slides are intended as a supplement to the orientation and on-going training that a program provides to faculty and preceptors in order to be in compliance with Required Element 7.3. Programs will still need to provide training on the program's mission, goals, objectives and educational philosophy, as well as training for preceptors about program-specific rotation descriptions and intern evaluations, to be fully compliant with Required Element 7.3. ACEND® has also provided a one-page document of directions that will help guide program directors on how to use this tool.

- View the PowerPoint and directions.

ACEND® Will Continue to Accredit Associate Degree NDTR Programs

The education requirement for eligibility to take the Commission on Dietetic Registration credentialing examination to become a dietetic technician, registered is NOT changing in 2024 and remains at the Associate Degree level.

ACEND® has recently learned that some associate degree Dietetic Technician Programs, accredited under the 2017 Standards, are considering whether they need to close prior to 2024 because of misinformation about the CDR change in eligibility requirements to take the Registered Dietitian Nutritionist credentialing exam. This change, that becomes effective January 1, 2024, means that applicants desiring to take the credentialing exam to become an RDN must have a minimum of a graduate degree to be eligible to take the exam. We would like to clarify that this change by CDR concerns the RD/RDN credential only. Referencing the "Graduate
Degree Registration Eligibility Requirement Frequently Asked Questions" dated July 2013, posted on CDR's website, the following question and response is noted:

**Question:**
Does this mean that the DTR eligibility requirements will move to a baccalaureate degree?

**Response:**
No. CDR does not plan to change the requirements for eligibility to take the registration examination for dietetic technicians to the minimum of a baccalaureate degree.

At this time, ACEND® has no plans to stop accrediting associate degree DT programs. Since the US Department of Education requires ACEND® to update its standards every five years, the 2017 Accreditation Standards will be reviewed and updated as 2022 Accreditation Standards. This includes the standards for DT programs which require a minimum of an associate degree to prepare graduates to be eligible to take the CDR credentialing exam to become a DTR.

Should you have any questions regarding this information please do not hesitate to contact ACEND® at 800/877-1600, extension 5400 or acend@eatright.org.

Registration Eligibility Processing System Submissions

As spring graduation dates near, the Commission on Dietetic Registration wants to remind all program directors that the most current program director forms, REPS policies, and exam resources are located on CDR's Program Director page. If you need a refresher on submitting students for eligibility in REPS, please review the Program Director Quick Start Guide or contact CDR staff at cdrexams@eatright.org.

July 2019

---

Integrated Experiential Learning in Nutrition and Dietetics – Definition
Integrated experiential learning in nutrition and dietetics is a curriculum design model whereby didactic coursework is combined with experiential learning in real-world and simulated settings. The curriculum is designed so that the learning that takes place within the classroom is then applied in a setting that is overseen by a preceptor. The key element in experiential learning is that the entire didactic learning does not come first within the program, followed entirely by experiential learning, but that both components are woven together throughout the educational program.

For example, during an introduction to a community nutrition course, students might learn about low literacy in the classroom (didactic) followed by developing a low literacy brochure as a course assignment (experiential learning) and later evaluating the effectiveness of the brochure in a community setting such as the local food pantry (experiential learning).

---

**August 2019**

**Language for Accredited Program Website regarding CDR's Master's Degree Requirement**

The following language has been developed for programs to post to their websites regarding the requirement for a minimum of a master’s degree prior to taking the CDR exam for RDNs beginning in 2024. It is recommended that four-year programs such as the DPD or CP post this information for potential students and the public in 2019 when students are applying to universities and programs and no later than prior to the start of the 2020-2021 academic year. This language is intended to serve as a guide and does not need to be posted on the website verbatim. Dietetic internships will also want to post similar information for their prospective interns as well.

"Effective January 1, 2024, the Commission on Dietetic Registration (CDR) will require a minimum of a master’s degree to be eligible to take the credentialing exam to become a registered dietitian nutritionist (RDN). In addition, CDR requires that individuals complete coursework and supervised practice in program(s) accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). In most states, graduates also must obtain licensure or certification to practice. Graduates who successfully complete the ACEND-accredited [program type] program at [Institution name] are eligible to [apply to an ACEND-accredited supervised practice program/apply to take the CDR credentialing exam to become an RDN].

For more information about educational pathways to become a RDN please click [here]."
July 2019 Virtual Town Hall Meeting Minutes

Thank you to those who participated in the July Town Hall; there were over 90 people on the call! In the past, the questions asked during the town halls were incorporated in the Monthly Standards Update. Since ACEND® stopped publishing the Monthly Standards Update in late 2018, ACEND® will now publish the Town Hall minutes, questions and responses.

- [July Town Hall Minutes](#)

Mindful of participants time, the Town Hall runs for one hour only; additional questions received but not answered during the Town hall are included in the Q and A section of the minutes.

October 2019

FAQs: Future Options for Free-Standing Dietetic Internships

ACEND® hosted and recorded a topic-specific Virtual Town Hall meeting on Tuesday September 24, 2019. Program options for free-standing dietetic internships were discussed regarding the 2024 CDR graduate degree eligibility requirement and the Future Education Model Accreditation Standards. You can access the recorded webinar and slides [here](#).

November 2019

April and November 2019 Computer Match Results

Every spring and fall, graduates of didactic programs in nutrition and dietetics participate in a computerized match process run by D&D Digital for placement in a nutrition and dietetic internship program. The combined results of the first round of the April and November 2019 computer match and a comparison with the previous two years are shown below.

<table>
<thead>
<tr>
<th></th>
<th>April and Nov 2017</th>
<th>April and Nov 2018</th>
<th>April and Nov 2019</th>
<th>% Change</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students Matched</td>
<td>2933 (53%)</td>
<td>3016 (57%)</td>
<td>2844 (60%)</td>
<td>-172 (6%)</td>
</tr>
</tbody>
</table>
As shown in the table, the match rate (i.e. the percent of applicants who match to a DI program in the first round of the computer match process) has steadily improved over the past three years. Factors contributing to this improved match rate likely include:

- Decreased number of graduates from didactic programs in nutrition and dietetics (DPD): Data from DPD programs indicate that the number of graduates in 2018 (6,281) was 9% less than the number of graduates in 2016 (6,887) reflecting a nationwide trend in declining university undergraduate enrollment.
- Decreased number of applicants participating in the computer match: The overall number of applicants participating in the computer match in 2019 was nearly 800 (14%) less than the number of applicants in 2017.
- Increased number of supervised practice options: ACEND® has encouraged growth in nutrition and dietetics internship and coordinated programs. Between 2010 and 2018, 10 new CPs and 17 new DIs have opened and 2018 enrollment (compared to 2010 enrollment) increased by 22% in CP (n=347) and 47% in DI (n=1,330) programs. In addition, more than 800 individuals completed an Individualized Supervised Practice Pathway during that time. In 2019, 12 newly accredited future education model graduate programs began admitting students.
• Moratorium on new Didactic Programs in Nutrition and Dietetics: ACEND® has not accredited any new DPD programs since 2009.

**ACEND® Welcomes New Program Accreditation Manager**

Laurie Kruzich, MS, RDN, LD, joined ACEND® as a Program Accreditation Manager on November 11, 2019. Laurie previously worked as a clinical associate professor with the dietetic internship program at Iowa State University. She has experience with distance education, online learning, and coordinating an ISPP program. She served as the interim program director from 2017-2018. She is excited to apply her experience in dietetics education to her new role with ACEND®. For a list of updated Accreditation Manager state assignments, which includes the states assigned to Laurie, view [ACEND Staff](#).

**Webinar Series on Interprofessional Practice and Education**

The National Center for Interprofessional Practice and Education is learning important lessons about how to redesign impactful interprofessional practice and education programs in ambulatory and community settings. Join them on webinars on "Real Stories with Real Impacts: What Worked for Accelerating Initiative Teams."

- [View more information about the webinar.](#)

**The ACEND® Board Endorses the Core Competencies on Disability for Health Care Education**

There are currently 53 million people with disabilities in the United States and this number with continue to grow as baby boomers age. Americans with disabilities still experience barriers to access routine clinical and preventive services as well as public health and wellness initiatives.

The Core Competencies on Disability for Health Care Education defines standards for disability training, including social, environmental and physical aspects of disability, to improve health care for people with disabilities. ACEND® supports these Core Competencies on Disability and is committed to continue to promote the development, implementation, and rigorous evaluation of nutrition and dietetics programs and ensure appropriate training of future graduates on health care quality and health outcomes for people with disabilities.

- [Read the Core Competencies on Disability for Health Care Education document.](#)
**ACEND® Board Approves Enrollment Monitoring Policy Revisions**

The ACEND® Board recently reviewed and revised its Enrollment Monitoring for ACEND Accredited Programs policy. Enrollment monitoring requirements are now the same for all program types.

The policy states that each ACEND® accredited program must establish an enrollment maximum, taking into account normal attrition rates, enrollment history, projected enrollment increases, and adequacy of resources to support student/intern success. Any program wishing to increase its maximum enrollment by three students/interns or 20%, whichever is greater, in one year will be required to submit a Substantive Program Change Request. The request would consist of current enrollment, proposed enrollment and resources to support an increase in enrollment.

More information about the documentation required to be submitted to request an increase in enrollment can be found in the ACEND®’s Guidelines for Requesting Substantive Changes.

---

**December 2019**

---

**Future Education Model Template Revisions**

ACEND® made a number of changes to the Future Education Model Accreditation Standards required templates based on feedback from demonstration programs. For Standard 1, Required Element 1.5, a new "Planned Supervised Experiential Learning Hours" template was added as a requirement. In addition, the curriculum map template (Standard 4, Required Element 4.1) was revised; the competency-based course plan template Standard 4 (Standard 4, Required Element 4.1) was removed as a requirement; and, a new competency assessment table (Standard 5, Required Element 5.1) was added as a required template. The revised curriculum templates remove the requirement of student-level assessment data collection by ACEND® and ensure that all performance indicators are incorporated in the curriculum through learning activities. Assessment of performance indicators is no longer required.

Accredited FEM programs must submit the completed revised and new templates by May 31, 2020 to demonstrate compliance. All demonstration programs must meet these new requirements by July 1, 2020.
