The Honorable Robert Aderholt
Chairman
House Appropriations Subcommittee
on Labor, Health and Human Services,
Education and Related Agencies
Washington, DC 20515

The Honorable Rosa DeLauro
Ranking Member
House Appropriations Subcommittee
on Labor, Health and Human Services,
Education and Related Agencies
Washington, DC 20515

The Honorable Shelley Moore Capito
Chairwoman
Senate Appropriations Subcommittee
on Labor, Health and Human Services,
Education and Related Agencies
Washington, DC 20510

The Honorable Tammy Baldwin
Ranking Member
Senate Appropriations Subcommittee
on Labor, Health and Human Services,
Education and Related Agencies
Washington, DC 20510

Dear Chairs Aderholt and Capito and Ranking Members DeLauro and Baldwin:

The 35 undersigned organizations working to promote the health of all individuals **urge you to provide at least \$130.42 million in the fiscal year (FY) 2027 Labor, Health and Human Services, and Education Appropriations bill for the Centers for Disease Control and Prevention's (CDC) Division of Nutrition, Physical Activity and Obesity (DNPAO) alongside an overall increase for CDC's National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP).** This level of funding would allow DNPAO to expand the State Physical Activity and Nutrition Program (SPAN) to all 50 states, continue support for the High Obesity Program (HOP) and Active People Healthy Nation, build state-level chronic disease prevention capacity, and scale local community interventions to prevent obesity and related chronic conditions.

Preventing and reducing chronic conditions like obesity requires a multifaceted approach to ensure that healthy eating and active living are accessible and affordable to all people and in all communities. DNPAO helps to make healthy choices easy choices by supporting access to healthy food options in community settings, active living, and childhood obesity prevention. Grantees work with early care and education facilities, hospitals, and worksites to support healthy living. Partners are leading efforts to make breastfeeding easier and promote healthier childhoods such as advancing farm-to-early childcare programs. DNPAO also conducts research and evaluation that fuels innovation.

Preventing chronic diseases like obesity is critical to reducing spending and making healthcare more affordable. More than 40 percent of U.S. adults live with obesity, a 15-percentage point increase over the last decade and a 30-percentage point increase since 2011. Similarly, the rate of obesity among children increased 42 percent from 2000 to 2020. Obesity is one of the leading drivers of healthcare spending in the United States – studies have found that obesity accounted for as much as \$260 billion in medical costs annually and more than \$1.4 trillion in economic costs.

We are urging Congress to provide at least \$130.42 million for the Centers for Disease Control and Prevention Division of Nutrition, Physical Activity and Obesity in the FY 2027 Labor, Health and Human Services, and Education Appropriations bill.

Thank you for your consideration of this request and your support for working to reduce chronic diseases in communities across the country.

Sincerely,
