The Accreditation Council for Education in Nutrition and Dietetics (ACEND) Presents:

Unconscious Bias Training

July 19, 2022
11:00 am – 12:30 pm CT

Presented by:

Francoise Knox Kazimierczuk, PhD, RDN, LD, ATC, CSCS, NSCA-CPT
Registered Dietitian/Certified Athletic Trainer, Assistant Professor at University of Cincinnati,
Department of Rehabilitation, Exercise, & Nutrition Science, Cincinnati, Ohio

ACEND continues its series of webinars to assist programs in addressing diversity, equity and inclusion. This training is the first of four webinars intended for programs to use in training their faculty, students and/or preceptors to meet the 2022 Accreditation Standards. This particular training is recommended for use with preceptors; however, it may also be used for the training of faculty and students. Black, indigenous and people of color (BIPOC) populations remain woefully underrepresented within most health disciplines. For many underrepresented minorities (URM), numerous barriers exist to becoming a health professional. Data indicates many of these barriers relate to bias and discrimination, both at the interpersonal and institutional levels. Addressing bias begins with the cultivation of skills to allow individuals to recognize schemas that can lead to problematic interactions. In this webinar, participants will learn about how mental schemas can inform unconscious bias and how to act with intentionality to disrupt bias. All ACEND stakeholders (faculty, administrators, preceptors, students, interns, etc.) are invited to attend this free webinar.

Dr. Knox-Kazimierczuk, is an Assistant Professor in the Department of Rehabilitation, Exercise, & Nutrition Science at the University of Cincinnati. Dr. Knox-Kazimierczuk is a Registered Dietitian (RD) and Certified Athletic Trainer (ATC). Prior to her work in academia, Dr. Knox-Kazimierczuk worked in clinical and community dietetics for over fifteen years focusing on behavioral health nutrition and obesity and worked in athletic training at the university and clinic setting for ten years. Dr. Knox-Kazimierczuk’s research is centered in racial/ethnic health disparities, with an emphasis on birthing and breastfeeding disparities as well as cardiometabolic disease. Dr. Knox-Kazimierczuk has used her experience as an Interaction Institute for Social Change (IISC) Facilitator for Racial Justice and trained Qualified Administrator for the Intercultural Competence Development Inventory (IDI) along with her twelve years of experience facilitating Diversity, Equity, & Inclusion (DE&I) workshops to address inequities through educating other dietitians and healthcare providers and by working with policy makers for change.
