**ACEND Virtual Town Hall Meeting**  
April 19, 2022, 11:00 a.m. Central Time

**Host:** Rayane AbuSabha, PhD, RD  
ACEND Executive Director  
**Presenter:** Nancy Prange, PhD, MPH, RDN, LDN  
DI Program Representative, ACEND Board

---

**Webinar Recording Link**

[https://vimeo.com/736184064](https://vimeo.com/736184064)

**Introduction/Announcements:** Rayane AbuSabha welcomed all in attendance and introduced Nancy Prange who presented the Town Hall information.

Nancy indicated the objectives for the virtual Town Hall:

- Provide ACEND update and announcements
- Provide an overview of ACEND's webinars and trainings
- Present latest outcomes data from ACEND programs
- Answer questions

Nancy began with updates from ACEND. Beginning in 2023, on the second Thursday in March, the Academy will celebrate NDTR Day. Following RDN Day (the second Wednesday in March), NDTR Day will honor the contributions of NDTRs as vital members of health care and foodservice management teams. The dates of the future NDTR days are posted on the slide (Thursday, March 09, 2023, Thursday, March 14, 2024, Thursday, March 13, 2025, Thursday, March 12, 2026, Thursday, March 11, 2027).

The 2022 Standards were released on September 1, 2021 and the Future Education Model Standards were recently released on November 1, 2021. Both standards have the same set date for adoption of June 1, 2022. Reminder the ACEND audit was delayed until December 2023 and this was based on program directors’ request.

The ACEND® Board voted to use a transition plan to support programs under review as they move to the 2022 Accreditation Standards. The transition plan describes allowances that can be used when a program is reviewed under the 2017 standards and needs to revise documents to come into compliance. The allowances are designed to help programs move to the 2022 Standards. The transition plan can be found on the [2022 Standards and Templates page](https://www.acend.org) under "Guidance Information". Directors of programs under review may contact the ACEND® manager assigned to the review for any questions regarding the use of the transition plan.

ACEND® recently updated the Future Education Model (FEM) website pages to make the information easier to access. You will now find the [original](https://www.acend.org) and [reformatted](https://www.acend.org) FEM Standards and Templates directly from the ACEND® homepage under "Accreditation Standards, Fees and Policies."

Nancy then provided updates about decisions made by the ACEND Board. At its October 2021 meeting, the ACEND Board voted to accept the FEM eligibility applications from programs for review on a rolling basis instead of in cohorts. Previously, ACEND® accepted the FEM applications only in cohorts only, with a set deadline in the month of December every year. Programs are invited to submit Eligibility Applications for Future Education Model Demonstration Programs at any time throughout the year.
A reminder that FEM programs get a number of incentives for being part of the demonstration project including several fees that are waived such as the eligibility application fee for candidacy programs or the substantive change fee for those that are reorganizing their program. Also once accredited the program will get a one-year annual fee waived. FEM demonstration program faculty are invited to participate in trainings on competency-based education and become part of the FEM demonstration programs with networking opportunities to support each other including the monthly virtual demonstration discussions.

ACEND has been receiving many inquiries from international students who would like to complete their nutrition and dietetics education in the US. These inquiries have increased significantly for the past year with more than a dozen inquiries each week. International students can help increase the diversity of your programs while at the same time alleviate the declining enrollments. To assist program directors, ACEND has posted on its website a recording to provide program directors with information on evaluating international students from FDE (Foreign Dietitian Education) and non-ACEND accredited programs. The recording is meant to help program directors understand how to evaluate students from international programs and is posted on the ACEND website under program director FAQs. We encourage programs to connect with the international office at their institution to work out a plan for evaluating international students and enrolling them in the program.

The ACEND Technology Committee is currently investigating adopting a competency assessment software to support ACEND programs’ assessment of the 2022 knowledge and competencies and FEM competencies and performance indicators. We hope to have a decision on which software to adopt in Fall 2022 and begin adoption of this software in 2023. This of course will be optional for programs to use; but many who are looking to adopt a software tool may want to consider waiting until hearing from ACEND.

ACEND has collaborated with the Academy’s Policy Initiatives and Advocacy team to identify federal grant opportunities for dietetics programs. These grants will support the recruitment, retention, and completion of nutrition and dietetics education programs for students from underrepresented backgrounds. We hope that this resource can act as a catalyst for programs to apply for funding opportunities or advocate for funding that their universities may already receive, and we will update and disseminate this document throughout the year.

Mark your calendars on Tuesday May 17 for another upcoming ACEND Webinar on DEI: Academy Member Interest Group (MIG) Panel Discussion: Strategies to Improve Diversity and Inclusion in Dietetics Education. The panel discussion will include representation from the Academy of Nutrition and Dietetics Member Interest Groups. Panel members will be asked to respond to questions regarding their dietetic education experiences and provide strategies for improvement. The panel will be moderated by ACEND Board member, Dr. Crystal Wynn. You can find more information about the webinar and the link to register for it on the ACEND DEI webpage. This webinar will be recorded and posted on the ACEND DEI webpage.

There is an upcoming webinar for students and interns that is presented by our student member on the Board, Emily Kuettel: The Art of Application: Tips to Make Yourself Stand Out to RDN Jobs! Encourage students to attend on Tuesday May 3, 2022 from 5:00 pm CT – 6:00 pm CT. To register, use the QR code or the Webex link: https://eatright.webex.com/eatright/onstage/g.php?MTID=ec17bcfe1ccfc4137df7ee03e3f5a58c5

Link was also included in the latest ACEND Update for March: https://www.eatrightpro.org/acend/public-notices-and-announcements/acend-update

We want to bring your attention to a recent webinar that was offered by ACEND to meet Knowledge and competencies that address RDN collaboration with NDTRs, specifically CRDN 2.5. This webinar was recorded and is now posted under the Program Directors FAQs and Resources, under the Resources for ACEND Program
Directors page. https://www.eatrightpro.org/acend/program-directors/program-directors-faqs Programs can use this recording as an educational tool to help faculty, students and preceptors understand the role of the NDTR in supporting the RDN. It can also be helpful to RDN practitioners and we encourage you to access this recording.

ACEND offers several workshops and modules specifically for program directors. These workshops are designed to help dietetic education program directors learn the latest accreditation standards and specific details on how to prepare for self-study reports, program assessment reports, and site visits. The next workshop that will cover both the 2022 Standards and the Future Education Model FEM Accreditation Standards will be held virtually on May 25-26, 2022. You can register for this workshop under training and resources. https://www.eatrightpro.org/acend/training-and-volunteer-opportunities/training-and-resources/program-directors-workshops We will also be holding an in-person workshop on October 7-8 during FNCE in Orlando. More information will be released about this workshop soon.

The ACEND 2022 Accreditation Standards were released on September 1, 2021 and become effective June 1, 2022. Programs must comply with the 2022 Accreditation Standards after June 1, 2022, although programs will have until December 31, 2023 to fully implement the new clinical skills knowledge requirement (KRDN 3.4) and competencies (CRDNs 3.3-3.6). To support program directors in their efforts to implement these new requirements, ACEND has begun its planning for hands-on clinical skills workshops. The first one will be held at FNCE in Orlando this October and future ones are planned to be scheduled throughout the United States. More information about the workshops will become available as they are scheduled.

Nancy took a moment to encourage attendees to consider becoming a program reviewer if not already. ACEND needs both educators and practitioners as reviewers. Serving as a reviewer provides a great way to network with other program directors and faculty and to learn new ideas for your program. It also helps you better understand the ACEND standards which will benefit your program. As a program reviewer you would review 2 – 3 program self-study reports per year and go on site visits to those programs. You would also review 2-4 progress reports each year as well. Program reviewers are also eligible to serve on the ACEND board. The application to become a program reviewer is posted on the ACEND website. https://www.eatrightpro.org/acend/training-and-volunteer-opportunities/program-reviewers ACEND is in need of FEM program reviewers. If you are already an ACEND reviewer and interested in reviewing programs under the Future Education Model Standards, contact ACEND at acend@eatright.org.

Nancy discussed communication with ACEND. ACEND will continue to issue its monthly update, typically sent on the third Tuesday of each month and posted on the ACEND website. ACEND also will continue its virtual Town Hall on a periodic basis. The next Town Hall is set for Tuesday, July 19 from 11:00 am – 12:00 noon central time. ACEND staff are always available to assist you and answer any questions you may have: 800-877-1600 x5400 and acend@eatright.org

Presentation on 2021 ACEND Program Outcomes Data:
Following the ACEND announcements, Rayane presented on 2021 ACEND Program Outcomes. This information will be posted to the ACEND website in the future. Before sharing the results, Rayane emphasized that the number of programs in some cells are small and that statistical analyses have not yet been completed. Results may not be significant. These data were recently shared with the Board and ACEND wanted to share them with programs; however, ACEND intends to run statistical analysis before posting on the website.

The first outcome measure examines the number of graduates who took the RDN exam within 12 months of graduation. The table on the slide shows that the DI programs associated with a graduate degree (the first
highlighted column) did slightly better than those without a graduate degree (95% versus 94%). Again, Rayane warned that this difference may not be statistically significant. The graduate coordinated programs (CP) showed a trend of better outcomes than the bachelor’s CPs with 94% of graduates taking the RDN exam compared to 80% and the FEM Graduate Programs or GP in the last column did best where all graduates (100%) sat for the RDN exam.

The second slide of outcomes data shows another ACEND outcome objective: Graduates who found jobs in dietetics within 12 months of graduation. The same pattern of results is seen where the graduate programs produced better outcomes and especially the FEM GP in the last column which was had the highest proportion of 92% of graduates finding jobs in dietetics within one year of graduation. Rayane again emphasized that the number of programs is small and that statistical analysis has not yet been completed. These differences may not be statistically significant.

The third slide of outcomes data shows the objective on graduates who are still seeking employment and looking for work. The trend continued where the FEM GP outperformed all programs with all the graduates have found job placements. Zero graduates are still seeking employment.

The fourth slide of outcomes data shows the pass rate on the RDN exam outcome objective. The first row in this table is for the first-time pass rate. For the first-time pass rate the graduate degrees consistently had higher first-time pass rate than programs without graduate degree. This is consistent with ACEND’s objective of one year of first attempt, with the FEM programs doing much better than all programs where more than 98% of graduates who took the RDN exam passed it within one year.

The fifth slide of outcomes data shows the diversity of the CP and GP programs which is very similar and not different for undergraduates versus graduate programs between 28% and 29% (last three columns). Rayane paused to commend DI programs at the significant efforts they have made in the last two years to improve the diversity of their students. Diversity of DI programs increased from 16%-24% between 2015-2019 to 29% in 2020 and 30% in 2021. DI programs were divided into programs that offer verification statement only and those that require a graduate degree. For this breakdown, the DI programs with a graduate degree reported less diversity of interns (25%) than those without the graduate degree (32%). Graduate degree DIs had a lower percent of diverse students compared to the graduate GP and CP. This could be for a number of reasons including the GRE exam, complicated university admission policies, or other reasons. Rayane asked DI programs with a graduate degree to work with their universities to improve the diversity of their interns.

Finally, the last slide of outcomes data is identical to the one on the previous slide. But here, HBCUs (Historically Black Colleges and Universities) and programs in Puerto Rico are excluded from the sample of programs because those are designed for URM (meaning they are by default ~90% Black or Latinx). By removing them, it allows to look at a true picture of diversity of our non-specialized non-targeted programs. As you see in this table, once we removed the HBCU programs and those in PR, the diversity of the BS/CP went down significantly from 28% (previous table) to 25%. This shows then that the graduate CP and GP programs’ diversity is higher than that of the bachelor’s CP. This analysis did not change for DIs, and DPDs, because there are so few HBCU and Puerto Rico programs compared to the whole that the impact of removing them was very small.

Following the presentation, Rayane thanked Nancy, opened the Town Hall for questions and comments in the chat. These are included below.
Questions/Answers:

**NDTR Day**
Can we find NDTR day dates somewhere as it went too quickly?
- Chat: Thursday, March 09, 2023, Thursday, March 14, 2024, Thursday, March 13, 2025, Thursday, March 12, 2026, Thursday, March 11, 2027

**FEM vs MS CP terminology**
Can you describe the actual differences between a FEM and a MS CP? Specifically, what is different for the student and the director.
- Nancy: In some respects, they are similar. The difference lies in that FEM programs are competency-based curriculum standards.
- Rayane: Additionally, the expectation of FEM programs is that there is integration of the didactic and supervised experiential learning together.

**Proposed Software Tool**
Will this software be free for programs, if not how much will it cost?
- Amy: ACEND would not be able to absorb the entire cost, but the plan would be for ACEND to cover the cost of software set-up. Because use of the software would be optional, the remainder cost would go to the program. ACEND could possibly negotiate a lower cost depending on the number of programs that would use it.

Will this software be available for non-FEM programs that are on the 2022 standards?
The software program to measure competencies can be applied to all programs, yes? RDN, NDT, FEM., etc.
In the cost of the software will you consider the size of the programs/schools? Is it only for FEM?
- Rayane: All program types will be able to utilize the software. Typically, these software programs charge by number of students. We expect that the size of the program will make a difference.

What is the predicted timeline on this software?
- Nancy: This detail is not determined yet, however the expected launch is 2023.

**FEM and GP acronym**
Is it still true that ACEND will move away from FEM and towards GP (graduate program)? Wondering about the status of these acronyms.
- Nancy: Yes, we will stop using the FEM acronym and starting using the GP acronym in June 2022.

**Clinical Skills Workshop**
Will the clinical skills workshop at FNCE be at an additional cost?
- Rayane: ACEND will try to absorb as much cost as possible to make the workshop as affordable as possible. However, ACEND’s experience has been that when a workshop is free, many individuals sign-
up but do not attend. While details are yet to be determined, an approximate cost may be in the range of $100-$150.

When will additional skills training dates be announced? Anything pre-FNCE for those not attending but launching this fall?

- Rayane: Unfortunately, nothing before FNCE will be possible. We intend to schedule 3-4 workshops per year, the first being at FNCE in Orlando. ACEND is seeking other Universities that are able to host the workshop and provide a variety of geographic locations. If you have a simulation lab that may be able to host, please email Rayane.

2021 ACEND Outcomes Data
Would be good to include sample size in 2021 ACEND program outcomes. Stats analysis would be good. This information is not very useful without an analysis.

What is "n" for GP program?

How can we say "significant difference" without the stats?

- Rayane: This data is forthcoming. The slides presented were a simplified breakdown of the data. When the data is released on the ACEND webpage (https://www.eatrightpro.org/acend/about-acend/acend-data), the data will be complete, the tables will be complex and include some narrative explanation.

Many people affected by covid-19 in 2020-2021 and were not necessarily seeking jobs.

Are those in graduate programs already employed, obtaining credentials for job advancement?

- Rayane: Obtaining the RDN credential, yes. However, we do not collect on other credentials.

For the FEM GP pass rate data - Will you provide data on who the students were - DPD trained applicants vs other BS applicants? DPD programs are considering whether maintaining accreditation is needed or not....

- Rayane: Unfortunately, we don’t separate that in the Annual Report so we don’t have exact data available to answer that question. However, it is estimated that > 50% of FEM students come from DPD programs.

It would also be beneficial to consider other variables besides program type, such as geographical location and availability of jobs when considering employment. We’re a bachelors DI with 100% employment within 12 months for the mast many, many classes because we are in a geographical location with a multitude of jobs available.

- Nancy: Geographical location is something that could be filtered when evaluating data and can be looked into completing.

Again, with FEM CBE...does the increased pass rates justify the increased cost (and potential decreases in credentialed RDs?)

- Nancy: We will not know that yet. When we look at other allied health professionals that have moved to graduate level, we know it does not happen overnight.

- Rayane: A presentation at FNCE from a FEM program showed that FEM programs can be 6-12 months shorter in length than separate DI and MS program, the average cost was less, and students can secure financial aid for completion of the program.
The diversity in DI programs in 2021 is showing that URMs that do not want an MS can get spots right now. Once that option is over, the URM numbers will go down in all programs.

- Nancy: It is possible, but ACEND is working hard to prevent that.

Can URM be defined or clarified? I seldom know who these students are from reading the application unless they specifically state such.

- Rayane: Underrepresented minority is defined by the government as a U.S. citizen who identifies as Black/African American, Hispanic/Latino, Asian, American India/Alaskan Native, and Native Hawaiian/Other Pacific Islander.

You mentioned that approx. 200 DI verification statement only and 100 graduate only DI programs were in statistics. How many approx. GP were in statistics you shared?

- Rayane: A very small number. Between 6-15 GPs with data are available. The ‘n’ will be provided with the data on the website. By next year we’ll have about 40 programs with data.

**Dietetic Internships**
Will verification statement only DIs eventually be transitioning to competency-based assessment?

- Nancy: It looks that way, yes.
- Rayane: We are doing analyses of competency-based education and students and faculty are feeling the benefit. This is a future discussion for the ACEND Board, and nothing has been decided. But this would not change the essence of the DI. The only change is that ACEND will provide DIs the performance indicators, which help to elevate the practice.

Will more trainings/resources be available for stand-alone DI’s transitioning to an MS/DI partnership?

- Rayane: Yes, the Board just approved a resource document for DI’s transitioning to a MS/DI program. In one to two weeks, it will be available on the website and will be included in the May ACEND Update.

**CDR Credentialing Exam**
My understanding is that CDR continues to not require that those taking the credentialing exam provide their names for reporting back to programs - what can be done about this?

This information is critical for ALL programs to have for their outcomes data as well as strategizing and planning

- Nancy: This is likely a question that CDR would need to answer.
- Rayane: Maybe NDEP can bring the ask back to CDR and request the ACEND Board’s support.

**April Board Decisions**
Do you know when programs who are awaiting accreditation status and under review in the April Board meeting expected to hear back?

- Rayane: ACEND sends decision letters 2 weeks after the Board meeting. The April 2022 meeting was April 11.

Rayane and Nancy thanked everyone (131 participants) for their discussion on the Town Hall. The call ended at 12:00 pm CT.
Welcome to the ACEND Virtual Town Hall
Nancy Prange,
PhD, MPH, RDN LDN

ACEND Board
Objectives

- Provide ACEND update and announcements
- Provide overview of ACEND’s webinars and trainings
- Present latest outcomes data from ACEND programs
- Answer questions
ACEND Updates and Announcements
Starting in 2023, Academy Will Celebrate NDTRs During National Nutrition Month®

NDTR Day honors the contributions of NDTRs as vital members of health care and foodservice management teams

Future NDTR Days

- Thursday, March 09, 2023
